

Laminar Flow Meter

FC0732

- Flow measurement from 0.01 ml/min to 5000 litres/min
- Measures pressure and flow simultaneously
- Programmable cycle times for production testing
- Up to 50 test settings
- Robust steel bench-top case
- Communications via RS232 or RS485

The FC0732 is a cost effective air/gas flow meter suitable for production line testing of gas industry appliances and valves, calibration of fuel injectors and many other flow measuring applications. The FC0732 can be easily interfaced to PLCs or PCS where integration is required.

Using the well proven Furness Controls laminar flow technology, the FC0732 adds temperature and barometric pressure compensation to provide an accurate flow measuring system with high resolution. The inherent low flow resistance of the design ensures minimal interference with the flow path.
